Outcome 5. Demonstrate knowledge and skills to build a comprehensive safety and health program based on loss control and regulations.

The assessment is performed with respect to the key abilities that the students are expected to acquire in specific courses that have been identified with respect to this outcome.

<table>
<thead>
<tr>
<th>Course</th>
<th>Key abilities</th>
<th>Performance indicators</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAFM 528</td>
<td>Required course: comprehensive evaluation of safety-related “business case”</td>
<td>Student will be able to describe typical elements of the “business case” in occupational safety and health after successfully completing SAFM 528.</td>
</tr>
<tr>
<td>SAFM 550</td>
<td>Required course: comprehensive loss-related data analysis</td>
<td>Student will be able to describe loss control techniques used in industry after successfully completing SAFM 550.</td>
</tr>
</tbody>
</table>

Tools used: SAFM assessment rubric; employer survey

Data Collected: SAFM assessment rubrics: student projects; homework; final grades
Surveys: Likert scale data

Frequency of data collection: SAFM Assessment rubrics: every semester
Employer survey: every third year

Analysis Method: Data reduced, tabulated and distributed as summaries to faculty and Visiting Committee members

Closing the loop: This outcome is subject to review based on performance criteria and metrics and specific action items are developed, if necessary, to revise the content of the courses.
Performance criteria and metrics:

a) SAFM Assessment rubrics: grades of 1-3 need no work on supporting courses
b) Employer survey: qualitative data (open-ended) written out verbatim, quantitative data tabulated

Key to assessment
M = Midterm exam
Q = Question
Final = Final exam
P = Project
Po = Portfolio
Pre = Presentation or oral reports
Man = Manual
E = Exercise or Abstract
C = Computation
RP = Role-Playing
FT = Field Trip
L = Lab
O = Other

Closing the Loop: Details of efforts to correct deficiencies (G. Winn, instructor)

** For [ semester, year] the following deficiencies were noted:

** For [ semester, year], the following actions were taken to address deficiencies:

Additional remedial work, if any:

Faculty discussion, if any:

SAFM Employer Survey
Employer/Supervisor Survey

West Virginia University
Safety Management Graduate Program
2014 Employer/Supervisor Survey

The Safety Management, Master of Science program at West Virginia University is conducting this survey, as part of an ongoing assessment program to evaluate its educational objectives and outcomes. We desire to continuously improve the quality of the educational experience that we provide to our students and believe your assessment of our safety management graduate can help guide us to make those improvements. Perhaps the best measure of the quality of the education and training we give our students is the evaluation of their employers/supervisors.

We request that you take the time to respond to this questionnaire. All responses are anonymous and will be held in the strictest confidence. We sincerely thank you for your time and effort in this assessment process. Please return your completed survey in the self-addressed, stamped envelope by October 15th.

Listed below are skills and abilities that we expect our graduates to possess at the time of graduation. Listed below are a series of questions addressing educational outcomes for the safety management program at West Virginia University.

Please base your evaluation on the following scale.

1 = strongly disagree
2 = disagree
3 = neutral
4 = agree
5 = strongly agree

Circle your rating for each question.
If for some reason a topic does not pertain to you, leave it blank.

We are particularly interested in comments (good or bad) regarding the quality of this individual's educational and professional training relative to graduate safety professionals from other institutions that have similar years of experience.

1. This individual has demonstrated adequate problem solving skills and abilities. (1 2 3 4 5)
2. This individual has demonstrated adequate understanding and application of safety management methodologies to successfully solve safety, health or environmental problems (1 2 3 4 5)

3. This individual has demonstrated adequate oral and written communication skills and abilities (1 2 3 4 5)

4. This individual has demonstrated adequate ability and skill to use computer hardware and software. (1 2 3 4 5)

5. This individual has demonstrated adequate ability and skill to work in project teams/groups. (1 2 3 4 5)
6. This individual has demonstrated adequate ability to work on interdisciplinary problems required.

(1  2  3  4  5) ______________________________________________________________________
